

Vehicle Interior Washers

This unit is designed to clean and sanitise the inside of vehicles where entry by personnel may be unpleasant, difficult, or possibly dangerous. Cleaning is by high impact, long range jets, and an indexing mechanism provides an evenly spaced wash pattern to give effective surface coverage.

Key benefits:

- o High energy water jets
- o Cost effective
- o Quick
- o Safe
- o Flexible
- o Easy to maintain
- o Unique rotating and indexing spray head
- o Avoid entry to confined spaces by doing the work from outside
